VETRI TECHNOLOGY SOLUTIONS

PRACTICAL EVALUATION

MODULE NAME: PYTHON FULLSTACK **MARKS: 40**

PRACTICAL PROJECTS(4*10=40)

1. Smart Login System with Security (10 Marks)

Scenario:
A company noticed users are accessing protected pages without proper login validation.

Task:
Build a secure login system:

- Create login API using Django / DRF
- Implement JWT authentication
- Protect React routes (only logged-in users access dashboard)
- Show error messages for invalid login

2. AI-Based Form Assistant (10 Marks)

Scenario:
Users are struggling to fill long forms correctly.

Task:
Create a smart form:

- Build form UI using HTML/CSS/Bootstrap
- Validate inputs using JavaScript
- Send input to backend
- Integrate AI API to suggest improvements (e.g., name/email hints)

VETRI TECHNOLOGY SOLUTIONS

3. Optimized Product Search System (10 Marks)

Scenario:
An eCommerce website search is slow and returns too many irrelevant results.

Task:
Develop a search feature:

- Create search bar in React
- Fetch filtered results from Django API
- Display matching products

4. AI Chat Module with History (10 Marks)

Scenario:
A startup wants to integrate a chatbot to interact with users.

Task:
Build chat system:

- Create chat UI in React
- Send messages to backend
- Integrate AI API for responses
- Store chat history in database
